

Kansas

Safe Routes to School

The Kansas Safe Routes to School (SRTS) Program helps communities across the state create safe and fun opportunities for students to walk, bike, and roll to school. When more students walk, bike, and roll, it's good for the whole community!

The Benefits of Safe Routes to School Programs

Save Families Money

Families can reduce car use and gas expenses when students walk, bike, or roll to school.

Increase Academic Performance

Students who are active before school have better focus and concentration in the classroom.

Improve Traffic Safety

Street improvements and student education can reduce crashes and make roads safer for walking, biking, and rolling.

Make Students Healthier

Walking, biking, and rolling increases students' physical activity and can improve physical and mental health.

Increase Personal Safety

There is less harassment, bullying, and violence when students walk, bike, or roll together or with adults.

Create Community

Walking, biking, and rolling together fosters stronger friendships and builds social connections for families.

Improve Air Quality

Less driving leads to cleaner air, which reduces the number of student asthma attacks.

Kansas Safe Routes to School is a multi-faceted program that can make walking, biking, and rolling to school a fun, safe, and easy choice for students and their families. Here's how the SRTS Program supports Kansas communities:

Funding Opportunities

Kansas SRTS grants help communities fund programs and projects that support walking, biking, and rolling to school.

Trainings and Resources

Through trainings, technical resources, and assistance, Kansas SRTS helps communities learn about and implement programs and projects.

Building Momentum

Statewide support and encouragement help the program to grow stronger and better in each Kansas community.
